

Working in Hostile Regions

AKE is a leading international security risk mitigation company providing a variety of fully integrated services. AKE distinguishes itself from other security services companies by taking a proactive, intelligence-led approach to assessing, monitoring, training for and protecting against risk. We assist clients in reducing their exposure to danger across a broad spectrum of risks.

AKE's three-day course designed specifically for professionals whose work takes them to challenging or hostile regions. Our clients come from the energy and mining industries (and include corporate, exploration and offshore personnel), aerospace, engineering, relief and humanitarian organisations, accountancy and other businesses and organisations.

Delivered in a blend of lectures and practical scenarios, supported by video footage and materials. The programme is comprehensive and interactive, and includes a series of challenging and realistic training exercises where you put what you've learned into practice.

Course Structure:

Security Awareness

A challenging or hostile region can be unpredictable, so awareness is your first line of defence.

Threat assessment

- What are the actual risks? Political, criminal, economic, terrorist

Culture and its impact

- The importance to your business of cultural and religious understanding
- Issues for women

The new and unconventional threat

- Terrorism and the 'new world order' in the post-9/11 world
- Chemical, biological and radiological incident risks
- How businesses must adapt

Medical

In the event of medical trauma, there may not be a hospital or ambulance nearby, so you need to act confidently and effectively.

- Medical intelligence: medical overview of relevant regions, how to reduce the chances of contracting an avoidable illness, effects of disease and illness
- Primary and secondary survey skills, airway management
- Primary treatment, controlling major bleeding, wounds
- Fractures
- Burns and scalds
- CPR
- Chemical, biological and radiological incidents, effects and prophylaxis
- Management of a road traffic accident
- Travel medicine, prophylaxis and vaccinations, common diseases and treatment
- Climatic conditions: heat and cold
