

# Crisis and Risk Management

AKE is a leading international security risk mitigation company providing a variety of fully integrated services. AKE distinguishes itself from other security services companies by taking a proactive, intelligence-led approach to assessing, monitoring, training for and protecting against risk. We assist clients in reducing their exposure to danger across a broad spectrum of risks.

AKE is the preferred support partner to clients when addressing risk and in the event of crisis. From designing bespoke packages, to training and implementation, we have conducted all aspects of risk and crisis management for clients, as well as audits of such on behalf of insurers.

AKE's risk and crisis management is intelligence-led, the core services of which are:

- Intelligence services including Global Intake, and political risk consultancy
- Security consultancy
- Emergency simulations, response assessment and training (desktop exercise)
- Location audits
- Training
- Monitoring
- Repatriation

## Global Intake

AKE's Global Intake is an online strategic intelligence and information resource. Designed as an indispensable tool for professionals in the international arena, Global Intake is a secure source of current political analysis, risk assessment and prevention, security and medical advice, and practical in-country information.

- Particularly useful to anyone planning overseas projects, travelling and for monitoring locations
- We monitor developments direct from the field and other sources, and update information daily
- Global Intake focuses on the world's hot spots, addressing the risks to those working in, or visiting challenging environments

## Land and Maritime Location Security Audit

The security of your facilities is essential to your operational success, so risk reduction frequently begins with a location security audit.

- Assessment of your security position and objectives
- Provision of a full threat assessment and local security analysis
- Assessment of probability and criticality of an incident, then
- Implementation of a comprehensive security plan, with periodic review

## Personal Security Review

Your executives, staff and families may be vulnerable in location - and if so, then their security, peace of mind and effectiveness, and your operations are compromised.

- Assessment of the threats posed to individuals and their families at work, home, and as they travel - all aspects are carefully reviewed for potential exposure to risk
- A detailed security plan designed and implemented, and then reviewed as the need arises

# Crisis and Risk Management

## Medical Audit

If there's a medical emergency and no ambulance or hospital nearby, it's essential that your own medical team be there with the right support and equipment. Managers of remote work sites such as oil and gas facilities, or mining and seismologists' camps, will want to be confident that their health and medical protocols are current and appropriate for the risks.

- AKE's medical auditors visit your location and assess the health and medical situation
- Examination of local health conditions and risks, onsite facilities and safety, vulnerability of personnel; plus medical, water and food supplies, and your emergency medical plan
- Assessment of the probability and criticality of an emergency
- Implementation of a comprehensive plan to minimise the risks

## Security Risk Specialists (not just close protection personnel)

If you're going to a hostile region and you want security and medical support, we can go with you. One of AKE's security risk specialists will accompany an executive or project team on the ground - all come from a Special Forces background and are highly skilled and experienced at helping you facilitate your work, while preserving your safety.

- Liaison functions
- Local fixer functions
- Objectivity to make certain personnel carry out agreed procedures and working practices
- Ongoing training support, such as life support skills
- VIP support - global executive support that protects the organisation, its intellectual property and its assets whilst the VIP goes about his or her business

## War and Political Risks Consultancy

AKE provides a comprehensive real-time risk consultancy service

- Every day during underwriting hours, an AKE risk consultant is part of the Special Risks Team, providing immediate comment and analysis on matters that come to the underwriters' attention in Lloyd's

## Insurance

After training with AKE, you will qualify for significantly reduced premiums for medical, accident and evacuation insurance, which can be upgraded to include coverage for war risks, terrorism and hostile territories if you wish.

## AKE Services
